

446Mhz Repeater

Unfortunately my english is bad.

I write with the help the translator program.

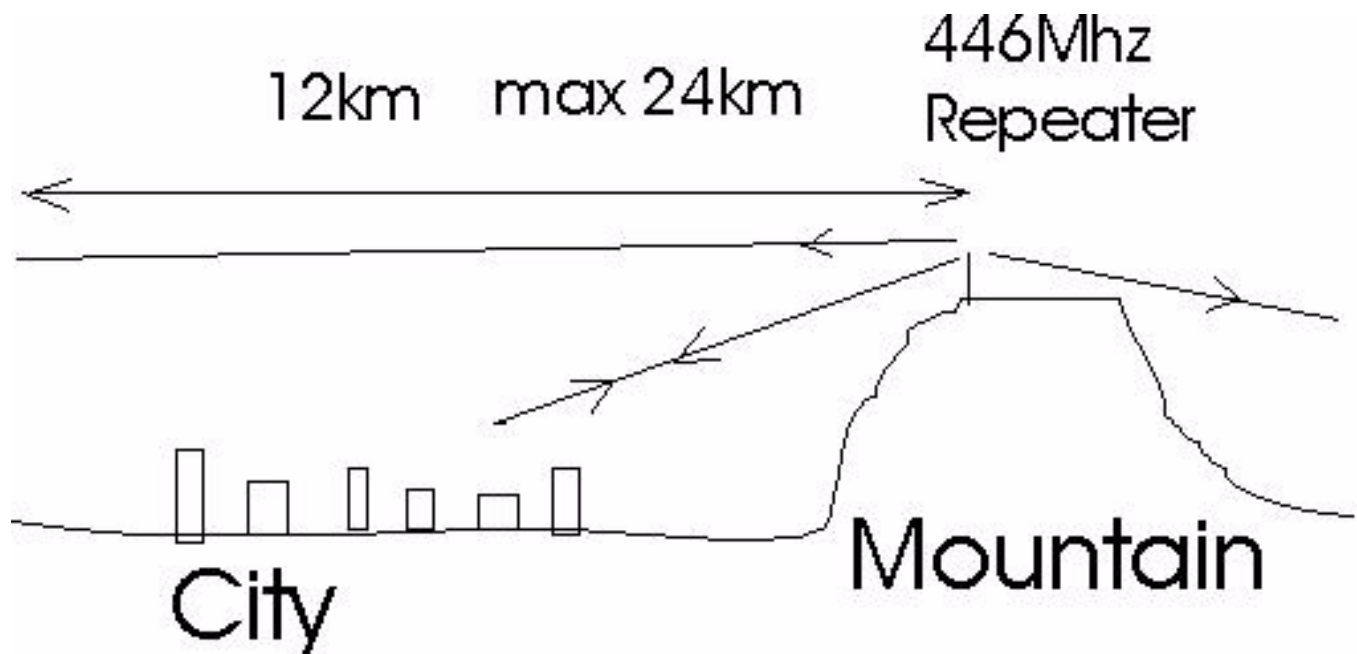

But I try tell repeating device PMR-radio.

You know these PMR-radios. On the radio can hear only 3km. From the one radio will make repeater. The repeater is invested high up to the mountain, and activity ray is multiple. This is legal. This is permitted. This will not break law. I can speaks 99km legally on PMR-radio.

This is a repeater. You see the antenna up to cork. inside has PMR radio. 12ah batteries and repater. This receives and sends. This is my hand made. The factory made are in many town Finnish . This device is 100m high. The device is in the tree top mountain. The device works 20 dates with one charging. the device concerns 25km normal on weather. Delivery Power is 0,5w.

These apparatus are high picture in the container. PMR-radio on Shuan Shing WT-405 (Telcom TE-150). Icom F22SR and Yeasu VX-146

My telephone network City name Mänttä. Mountain name a Mäntän vuori .
Behind the mountain is my island. The name of the lake is Kuorevesi .
